

OSA # 2866-63

20 May 1963

Frank.

STATINTL

[REDACTED]

Dear Wendel:

We are firmly situated in our new plant, and I have enclosed a photograph, a layout, and a list of our equipment.

STATOTHR

STATOTHR

As illustrated by our job for [REDACTED] others for Harry W. and one we are contracting for with the Army at Ft. Huachuca, the bulk of our efforts are being directed towards "quick-reaction" type programs. We were visited on May 16th by [REDACTED]

STATOTHR

U. S. Army, who felt that we could serve very well in such a capacity for some Army programs, commensurate with our size and capacity.

As I indicated to you in my visit two weeks ago, it was not our intent to compete with the giants in our industry. Having worked with your activity in the past, and having on our staff very competent engineers and technicians, who also have, I am anxious to explore the possibilities of your activity utilizing our company, its personnel and facilities as a quick-reaction capability for those smaller jobs in the photo-optical design and fabrication area which are difficult to accommodate by larger companies.

I would appreciate your comments, and should this be an interesting proposition, I would be happy to discuss this further with you on my next visit east.

STATINTL

Sincerely,

STATOTHR

Passed on to [REDACTED] Bureau informed No AWS will be required
